

A4 Report

Jinyue CHEN

5/7 2025

1 Checkpoints

A terminal window titled 'make - assignment4-sched_250507' showing the output of a 'schedtest' command. The output lists turnaround and waiting times for various worker processes (pid 83, 78, 77, 79, 76) and the time used by each. It also indicates that 10-times tests passed. The terminal ends with '[pid 3] Turnaround = 2668, Waiting = 2668' and 'sh > child 3 exit with code 0'.

```

[pid 83] Turnaround = 246, Waiting = 113
worker 78: exits at 2976
[pid 78] Turnaround = 259, Waiting = 124
worker 77: exits at 2977
[pid 77] Turnaround = 260, Waiting = 126
worker 79: exits at 2977
[pid 79] Turnaround = 260, Waiting = 126
worker 76: exits at 2982
[pid 76] Turnaround = 265, Waiting = 132
schedtest: worker pid 76: used 265 time
schedtest: worker pid 77: used 260 time
schedtest: worker pid 78: used 259 time
schedtest: worker pid 79: used 259 time
schedtest: worker pid 80: used 133 time
schedtest: worker pid 81: used 130 time
schedtest: worker pid 82: used 129 time
schedtest: worker pid 83: used 129 time

===
schedtest: 10-times tests passed
===

[pid 3] Turnaround = 2668, Waiting = 2668
sh > child 3 exit with code 0
sh >>

```
